

Toilé

The Toilet Evolution

WC with integrated air aspirator

WC con aspiratore d'aria integrato

MEDICAL DEVICE / DISPOSITIVO MEDICO N°
2021139

UDI: 8056459897007

CE

Made in Italy

PATENTED

(EN) Toilé is connected to the hydraulic pipes as any other standard toilet, so it can replace any existing standard WC without the need for building work.

The connection of the power socket must be carried out according to IEC 60364-7-701

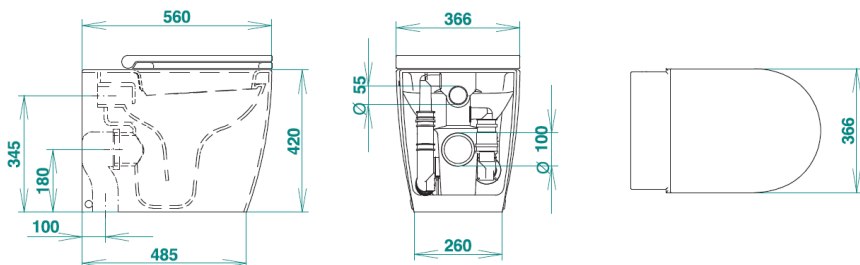

In order to achieve the appropriate aerosol extraction performance and to ensure quietness in operation, the WC must be connected to the drain pipe and the WC trap filled with water.

(ITA) Toilé è collegato all'impianto idraulico come un WC standard, quindi può sostituire ogni WC esistente senza richiedere opere murarie.

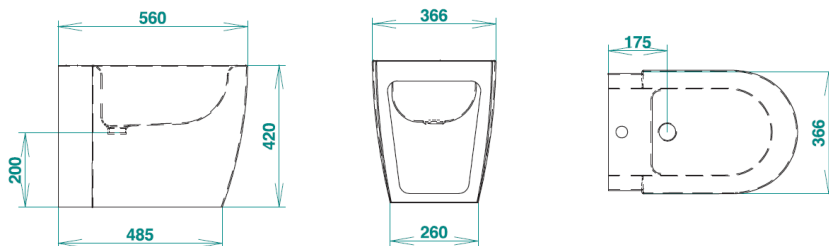

Il collegamento della presa di corrente va eseguito secondo IEC 60364-7-701

Per garantire le corrette prestazioni di aspirazione dell'aerosol e assicurare la silenziosità in funzionamento, il WC deve essere collegato alla rete fognaria e il sifone riempito d'acqua.

Toilé WC

Toilé BIDET

TECHNICAL DATA

Power Supply	AC 220-240V, 50Hz
Power	55W
Norms	Council Directive 93/42/EEC Regulation (EU) 2017/745 (MDR) EN 33 EN 60335-1
